

The Clasper™ package

# Dual-container package opens door for disruptive products

The Clasper™ blow molded PET bottle technology is now available to brand managers who want to market a boundary-pushing product in a package which requires two separate containers.

The Clasper double-bottle concept provides a solution for products that cannot be premixed or must be consumed in sequence. It also opens the door for new sub categories and creative product development.

Positive feedback also has been provided by consumers who have been delighted by the unique usage experience this container provides.

## Features:

- bottom container snaps into the base of the larger top bottle
- can be blow molded in various sizes
- can accommodate liquids or powders
- hot-fill option
- heat or induction seal for the bottom container, traditional closure for the top bottle
- shrink sleeve or other label types can be used to promote brand, provide usage instructions

## Markets/products:

- Beverage
- Food
- Personal care
- Healthcare
- Pharmaceutical
- Nutraceutical
- Industrial
- Household chemical
- Toys
