

EDUCATE

PTI offers expert training globally

Regardless of your plastic packaging area of interest, odds are that PTI already has a training module that can benefit you and/or your employees.

Course instructors are industry experts with many years of experience in their respective fields. Most seminars are conducted in small group classroom style which allows for interaction, networking and practical application sessions. Some of the courses offered include:

- Technology and Application of PET Packaging
- Plastic Packaging for Hot-Fill / Aseptic Beverages
- Design of Experiment Tool: Practical Application
- Operator training: PET Processing

Custom courses

PTI can provide customized training based on your company's needs and objectives. Additional subject areas include:

- Packaging design and development
- Aseptic packaging
- Resin production, chemical processing, advanced material drying
- How the recycling value chain works (including processing and regulatory aspects)
- Barrier technologies and applications
- Oriented polypropylene container development and processing
- Biopolymers for packaging applications

For any questions regarding our training programs please call **+1 419 867-5424** or email: training@plastictechnologies.com

The Packaging Conference *where business opportunities and technology meet*

The Packaging Conference (TPC), produced by PTI and SBA-CCI, Inc., has established a reputation as the **must-attend event for the debut of new technologies and other key industry announcements**. TPC is so unique because it was created and is produced by people who know the industry's value stream and understand its challenges.

- The Packaging Conference is where business opportunities and technology meet.
- Major brand owners share case studies on successful launches.
- Wide packaging industry cross-section attends/presents. Includes brand owners, suppliers (resins, equipment, materials, supplies, services), associations/organizations and other key influencers.
- Topics include the latest technical developments, trends, developing markets and end-of-life analysis.
- Multiple networking opportunities
