

TEST

Where the plastic packaging industry goes for reliable results™

Plastic Technologies Inc.'s Global Analytical Testing Laboratories offer a wide range of plastics packaging testing capabilities. With more than three decades of experience, we know how to provide testing solutions for your specific applications.

- Confidential and independent resource
- Reliable, accurate results
- Rapid turnaround

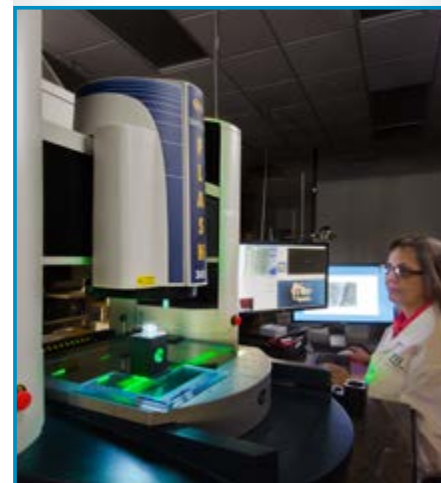

Put your package to the test in our global facilities:
United States, Europe and India

Full-service capabilities

Material testing

High-resolution measurements

PLASTIC TECHNOLOGIES, INC.

TEST

Plastic material testing

- PTI can provide accurate and reliable results
- Please check our website for our wide-range of material testing capabilities

Preform and bottle testing

PTI's certified lab can assist you by analyzing your preforms and/or bottles, provide qualification data and/or assist in third-party verification

Packaging and film permeation testing

PTI offers oxygen, carbon dioxide and water vapor permeation testing for rigid, semi-rigid and flexible packaging materials and finished packages. This sophisticated testing can be carried out on a number of platforms to meet your needs.

- O₂ barrier testing
- Water vapor transmission rate (WVTR) testing
- CO₂ shelf-life testing

ISBT and specialty protocols

PTI can administer a significant number of the International Society of Beverage Technologists' Voluntary Standard Test Methods for PET Bottles.

We often develop specialized test protocols to assist in the proper determination of performance requirements.
